

Thank you for purchasing an organicKidz™ Baby Bottle. This care guide is designed to provide you with information that will ensure the optimal use and longevity of your baby bottle.

Remember, stainless steel is the healthy alternative to plastics and the unbreakable alternative to glass. Stainless steel is dent resistant and does not leach toxins like aluminum.

Our bottles convert to Sippy Cups and Water Bottles. Handles and spouts are available through organicKidz™ and our retailers.

Please visit our website or retailers for additional organicKidz™ products.

Features

Lid

- Lid doubles as a built in 2oz/60mL measuring cup
- For a more snug fitting lid, place the lid on its side on a flat surface and press down until you have the desired fit
- Can be used as a snack cup for little fingers picking up little snacks

Nipples

- Compatible with most narrow necked nipples
- Nipples are made from silicon
- Additional nipples are available through organicKidz™ and our retailers

Bottles

- Durable, lightweight container
- Naturally bacteria resistant
- Components are BPA, PVC, Phthalate and Lead free
- 125mL and 210mL bottles are single hulled for quick warming in a bottle warmer, a pan of water heated on the stovetop, or in a container of hot water
- The single hull allows you to feel how much liquid is inside by using the scale on the side of the bottle
- 270mL bottles are vacuum insulated to keep liquids hot or cold for up to 6 hours

Common Sense Cautions

Cleaning

- Bottles are dishwasher safe (top rack)
- Hand washing and sterilizing in a counter top steamer will extend the life of designs
- Wash all bottle parts in hot, soapy water prior to first use
- If sterilizing for your baby, use a steamer only. Remove from steamer by threads, not bottle body so designs remain intact

Cautions

- Always test the temperature of the liquid before giving the bottle to a baby
- Do not heat in microwave oven
- Use caution when handling hot bottles or serious burns may result.
- Check nipples prior to each use
- Discard all nipples that have tears or cracks
- As with all baby bottles, do not put baby to bed with bottle
- Do not leave premixed formula in any non refrigerated container for more than 1 hour or it may spoil
- organicKidz™ is not responsible for normal wear and tear to this product
